">lopressor 20 mexico buscando puede usar lopressor en el trabajo hola ryan_46: i did not work Ricky: one other thing, your ubuntu is booting in some way weird right? Rehan: I think your best bet would be to simply request in #winehq, but chances are that your app won't run under wine as well as it might run natively jus_: cool, thanks ryan_46: yes Ricky: and what did you do to try to get it to work? roasted: np hi, my ubuntu box uses the /var/lib/ecryptfs folder to store the home folder (including passwords) encrypted. I am setting up Ubuntu 11.04, and am wondering how to make the encryption mountpoint, so that I can access the folder without a password? Ricky: Can you give me a screenshot of the error and I will try to help? roasted: there is a strange tool called 'cloak' chacalsogna: yes, I'm sure you can figure it out jus_: I'm not sure what that is roasted: roasted: read it Ricky: I assume the same error that came up in the recovery area, I think you tried mounting it using the -f flag right? ryan_46: i didn't try, i don't know. let me try now ryan_46: /dev/mapper/cryptswap1 does not exist ryan_46: i'm on live usb jus_: I'm gonna read it, thanks :) roasted: you should have it before you get into win server, this would be very useful thanks reisio, ill get right on it hello, how do i get linux to boot with noac 82157476af
